**NEVER** ATTEMPT TO USE THE FABRIC VALVE COVERS AS A HANDLE TO CARRY THE FURNITURE

### **WE RECOMMEND**

**FOR INFLATION WE RECOMMEND THE OUTDOOR REVOLUTION**

**DC 12V ELECTRIC AIR PUMP - ORBK0066**

**(NOT INCLUDED IN THIS PURCHASE)**

**AVAILABLE FROM ALL GOOD OUTDOOR REVOLUTION RETAILERS**

## **HOW TO INFLATE**

**IMPORTANT!** - This product consists of 2 internal air chambers, each with its own separate inflation valve.

Locate the air valve, ensuring the end cap is open (leaving the black non air return valve inserted) and connect to your inflation device with a compatible size air connector nozzle. Inflate using either a manual air pump or a low pressure electric air bed air pump. Inflate the chamber to your desired firmness.

**WARNING!** - DO NOT OVER INFLATE

Once inflated to your desired firmness, detach the connector nozzle from the non return valve on the inflatable sofa and insert the end cap to close. The whole valve can then be fully pushed into the product so that it lays flat on the surface without protruding.

## **INFLATE**

## **HOW TO DEFLATE**

To deflate, simply pull out the black non air return valve from the valve housing. With gentle pressure, push down the air chamber to expel the air. To fully expel all the air, enabling the product to be folded down as small and compact as possible for storage, we recommend that you use an air pump (either manual or electric low pressure air bed air pump) set in reverse to fully deflate all the air from the product.

## **DEFLATE**

## **IMPORTANT!**

Once inflated it is important to ensure that the valve cap is securely closed and seated properly. Failure to do so may result in the slow deflation of your air furniture, which will then require topping up with more air. If this happens, it is important to recognise this as a user error and not a puncture or fault with the product.

**CORRECT** ✓

**WRONG!** ✗

## **WARNING!**

**NEVER** USE AN ELECTRIC HIGH PRESSURE AIR PUMP FOR INFLATION AS THIS IS LIKELY TO QUICKLY OVER INFLATE THE PRODUCT WITH A HIGH RISK OF RUPTURING THE AIR CHAMBER
