OXYGEN WINDBREAK

INSTRUCTIONS & CARE MANUAL

- Damage caused by incorrect maintenance of the product.
- Flaws in the fabric caused by excessive use.
- Imperfections and pulls in mesh doors due to wear and tear.
- Water ingress through fabric as a result of accelerated UV degradation due to long term pitch .
- Water ingress through seams caused by excessive abrasion of seams or taped seam.
- Broken zips caused by over tensioning, forcing or snagging.
- Over tensioned/stretched seams coming apart.
- Buckles subjected to undue force or abrasion.
- Lost/popped out eyelets.
- Broken holdalls.
- Pole breakages or tube punctures (where applicable).
- Collateral damage from a pole breakage.
- Condensation, (a natural occurrence, exacerbated by insufficient ventilation opening).
- Consequential damage/loss to property/belongings (either inside or outside of the product) or shortening of holidays.

Outdoor Revolution work very closely with our retail partners to manage all warranty repairs/issues:

Please contact your retailer immediately (even if purchased online) if you feel your Outdoor Revolution product has a genuine warranty issue. The retailer, in turn will raise the issue with ourselves and we will action; with the retailer, according to the nature of the claim.

Returning Products

Please ensure the product is clean and dry and as close to its original condition as possible before sending back for checking. Wet or dirty products will not be accepted back for checking/warranty claims.

It is important to note that the Sales Contract between yourself and the retailer you purchased the Outdoor Revolution product from, remains valid throughout any warranty claim and your statutory rights are not affected.

IMPORTANT INFORMATION

- ◆ Please do not leave for your holiday without fully erecting and checking that you have all the listed contents for your windbreak. If you are missing anything, then please contact your retailer immediately before use.
- ◆ Please ensure that you site the windbreak on clear/level ground before erecting, with no sharp objects beneath and zips fully closed. We suggest placing a groundsheet underneath the windbreak to keep it dry/clean.
- ◆ We suggest conducting a trial run of your windbreak to familiarise yourself with the assembly and usability of the model. Should you have any issues in relation to pitching your windbreak; please contact your dealer for assistance before setting off on your holiday.
- ◆ Please note that this is designed for short term usage and not long term pitch.
- ◆ Always properly dry and air the windbreak after use, before packing away, in order to prevent mildew or mould from accumulating.
- ◆ Any dirt/stains can be removed by brushing, or gently washing, using warm water. DO NOT use detergents, as this destroys the material waterproofing.
- ◆ DO NOT cook or smoke within close proximity of this windbreak, as despite the outer fabric being flame retardant; it will still melt.
- ◆ In the event of damage; please contact your retailer. If, for whatever reason, you are unable to contact them; please email our dedicated customer service team on cs@blue-diamond-products.co.uk who will be pleased to assist you.
- ◆ Please avoid using this windbreak in temperatures below freezing, as this can result in cracking of the Oxygen Air Frame.
- ◆ Always store your windbreak flat, rather than on the side of the bag, in a cool/dry area, to avoid any detrimental impact on the product.
- ◆ Carefully monitor inflation pressure to avoid overinflating the windbreak.
- ◆ Please do not pitch the windbreak during severe weather conditions, as the warranty does not cover such eventualities.

OPTIONAL ACCESSORIES

- **Windbreak Panel Section** - An extra windbreak panel section, which can be zipped to either side of the windbreak, in order to extend the product as much as you require.
- **6mm Kadar Strip** - The addition of a Kadar Strip permits the attachment of this windbreak to your caravan's vertical end rail.

12 MONTH MANUFACTURERS WARRANTY

On The Workmanship & Canvas Against Any Manufacturing Faults.

OUTDOOR REVOLUTION GUARANTEE

Outdoor Revolution products are designed and produced to the very highest of manufacturing standards, using the best quality fabrics or components available for each specific model. Rigorous quality control of finished products is in place.

All manufactured products are:

- Quality controlled to be free from minor defects.
- Fit for the purpose that they are intended for.
- Manufactured to a satisfactory quality.

It is important that correct care is taken when opening, erecting, using, and just as importantly, packing away the product. Following these rules will keep your product in reliable working condition for many years. Failure to adhere to these simple guideline may cause unnecessary damage to the product (see formal instructions for handling/erection tips). A repair kit is included with each of our products to help resolve any minor issues.

THE WARRANTY

The Outdoor Revolution Warranty lasts for twelve months from the original date of purchase; please keep all receipts or copies of any relevant transaction to substantiate the purchase date. This warranty only covers the workmanship, fabric and components. Any faults found within six months of purchase will be investigated by Outdoor Revolution. Faults found outside of the initial six months of purchase will need to be proven by you, the purchaser, in line with current consumer legislation, after the short term right to reject has concluded. **Please note that this warranty requires registration on our website.**

Retailer will not refund a purchase if no fault is found.

The manufacturers warranty does not cover the following:-

- General wear and tear over extended periods of use or, seasonal pitching of the product.
- Accelerated UV damage caused by excessive, long term sun exposure.
- Accidental damage caused by but not exclusive to, human, animal or weather.

PACKING AWAY YOUR WINDBREAK

- ◆ Unpeg any pegging points and guylines.
- ◆ Open each of the Dynamic Speed Valves in turn and push in the quick release button; leave the button pressed in.
- ◆ Unzip any extra windbreak panel sections before packing away.

Allow the windbreak to collapse on itself. Compress as much air out of the tubes and canvas as possible.

Fold the windbreak on itself vertically to form a rectangular shape.

Fold the windbreak on itself to create a streamlined shape. Measure the width of the folded windbreak against the bag to ensure it will fit inside. Begin rolling the windbreak, pushing any air out as you roll.

Rotate the rolled windbreak into the designated carry bag; compress this as much as you desire for ease of transportation.

PLEASE READ THE INSTRUCTIONS CAREFULLY

TIP: Refer to the photographs to help when pitching your **Oxygen Windbreak**.

1. Spread the windbreak frame out on the ground as flat as possible.

2. Locate the first 'Dynamic Speed Valve' and ensure that the valve is **closed**, before attaching the pump; the valve is **closed** when the button is in the external position. There is an additional valve at the other end of the tube, which must also remain **closed**.

3. Attach the pump to the first 'Dynamic Speed Valve' and begin to carefully inflate, ensuring that none of the fabric is caught anywhere.

4. Inflate the first Oxygen Air Frame Tube until you can give it a 'good squeeze', as the tube requires some room inside for air to expand, should there be an increase in the ambient temperature.

5. Replace the cap on the valve and cover it using the Velcro sleeve for a neater finish. Repeat steps #2 - #5 with the remaining two inflation points.

6. Rotate the flexible hinged sections to adjust the configuration to suit your personal preference.

7. Secure as many of the designated pegging points and guylines as possible, starting from one side, before working your way across, tensioning the windbreak as much as you desire; please be careful to not overtension the material.

8. Should you wish to; you can purchase 6mm Kadar Strip to fix this windbreak to your caravan vertical end rail, in order to enclose the space between the two. Extra zip on panel sections can also be purchased, in order to extend the windbreak from *either* side.
