ALWAYS STORE THE INFLATABLE FURNITURE IN A BOX TO AVOID PUNCTURES OR DAMAGE

WE RECOMMEND

FOR INFLATION WE RECOMMEND THE OUTDOOR REVOLUTION

DC 12V ELECTRIC AIR PUMP - ORBK0066

(NOT INCLUDED IN THIS PURCHASE)

AVAILABLE FROM ALL GOOD OUTDOOR REVOLUTION RETAILERS

HOW TO INFLATE

IMPORTANT! - This product consists of 1 internal air chamber.

Locate the air valve, ensuring the end cap is open (leaving the black non air return valve inserted) and connect to your inflation device with a compatible size air connector nozzle.

Inflate using either a manual air pump or a low pressure electric air bed air pump.

Inflate the chamber to your desired firmness.

WARNING! - DO NOT OVER INFLATE

Once inflated to your desired firmness, detach the connector nozzle from the non return valve on the inflatable sofa and insert the end cap to close. The whole valve can then be fully pushed into the product so that it lays flat on the surface without protruding.

HOW TO DEFLATE

To deflate, simply pull out the black non air return valve from the valve housing on both air chambers. With gentle pressure, push down the air chamber to expel the air.

To fully expel all the air, enabling the product to be folded down as small and compact as possible for storage, we recommend that you use an air pump (either manual or electric low pressure air bed air pump) set in reverse to fully deflate all the air from the product.

WARNING!

NEVER USE AN ELECTRIC HIGH PRESSURE AIR PUMP FOR INFLATION AS THIS IS LIKELY TO QUICKLY OVER INFLATE THE PRODUCT WITH A HIGH RISK OF RUPTURING THE AIR CHAMBER
