The Best Range of Family Air Tents…
Available for 2017 from Outdoor Revolution

Outdoor Revolution has created the ultimate, most innovative and reliable products for 2017 to ensure the very best experience of the great outdoors.

Established in 2003, Outdoor Revolution has continually led the market with technological advances to maintain the status as the most aspirational manufacturer in the Inflatable Family Tent market. The range for 2017 has taken the very best features of new technologies available to design, manufacture and provide the most aspirational products available, whilst offering unequalled value for money…

...Do not settle for second best!
Why buy an Outdoor Revolution Product?

Following the success of 2016 and in line with our ambitions and ethos, we are determined to continue our mission to create market leading technology with parities in regard to quality. We have dedicated lines of manufacture to ensure consistency of expertise, exceptional quality control processes, combined with an offer of unequalled value for money. We have the most reliable inflation system on the market and best weatherproof and fade resistant fabrics. We have introduced some exciting new additions to the current line-up of features, affording true stand-out products and a must-have brand for the end-user.

Oxygen Air Frame

Condensation Explained

Condensation is a completely natural occurrence which happens when warm air meets cold surfaces, also the average adult breaths out a litre of water vapour every day. All Outdoor Revolution products are protected with a durable water repellent treatment and all seams are heat sealed. This prevents water seepage, but can also prevent the moisture trapped in the air from escaping, creating condensation. To help reduce condensation we have added multiple ventilation points on every product, mesh fly screens on doors, as well as dual zip windows, which can be opened by either over inflation or increases in the ambient temperature. The air vents are discreetly concealed by a Velcro cover.

Pioneering Technology

Phoenix mesh is an innovatively designed ‘smart’ material that has the structurally incorporated ability to repair itself. The dynamic Speed Valve and the intelligent Frame Relief Valve. This means an incredibly fast process with the dual action mechanism, which can be opened and closed by expelling any excess air which can be caused by over inflation or increases in the ambient temperature, or even over a period of time. We are the only tent manufacturer to use the Relief Valve. This prevents damage to the tube by either over inflation or increases in the ambient temperature. The valves are discretely concealed by either over inflation or increases in the ambient temperature. The tubes are discreetly concealed by a Velcro cover.

Climatic Fabric incorporates the patented Intelligent Frame Relief Valve. This valve incorporates the Dynamic Speed Valve and the intelligent Frame Relief Valve. This means an incredibly fast process with the dual action mechanism, which can be opened and closed by expelling any excess air which can be caused by over inflation or increases in the ambient temperature. The valves are discretely concealed by either over inflation or increases in the ambient temperature. The tubes are discreetly concealed by a Velcro cover.

The exclusive Oxygen Air Frame is the easiest, most reliable technology on the market. This carries a 3 year tube warranty.

Lounge Liners

interior roof liners offer added insulation and a touch of luxury to the tents interior, creating a more pleasant living space. Helping to keep heat inside on cooler nights and helping to reduce condensation.

Pioneering Technology

Climate Fabric incorporates years of learning to provide a high performing man made fibre with the breathability of polycotton. This superior fabric provides the ultimate performance of any tent fabric, marrying the water repellent properties of polyester with the comfort of natural fibres. We are the first commercial manufacturer to introduce this fabric. Another first for Outdoor Revolution.

The double thickness double rip-stop fabric is the most robust of all of our tent fabrics. We have used the latest textile manufacturing techniques to provide the durability, longevity and performance properties of much heavier denim fabrics without the impracticality and constraints of their weight.

The innovative Oxygen Air Frame incorporates the patented Intelligent Frame Relief Valve. This valve incorporates the Dynamic Speed Valve and the intelligent Frame Relief Valve. This means an incredibly fast process with the dual action mechanism, which can be opened and closed by expelling any excess air which can be caused by over inflation or increases in the ambient temperature. The tubes are discreetly concealed by a Velcro cover.

Tailoring the fabrics to each product... ensuring optimum strength to weight ratio.
O-Zone 6.0 XTR Vario

The spacious interior of the O-Zone 6.0 XTR Vario.

Vario Door set internally to create a functional open front.

NEW

2017 Model

“This Ultimate Airframe Tent with outstanding new design features...

Setting the standards by which all large family air tents will be judged”

Outdoor Revolution’s ‘Flagship Family Tent’; the O-zone 6.0 XTR Vario is brand new for 2017. Based on our best-selling 6.0 XTR with the addition of new outstanding features, including a Vario door system that can move back and forth to create additional living space or an integrated porch area.

Manufactured using Outdoor Revolution’s 250 high-density double rip-stop endurance fabric, which provides the optimum strength to weight ratio of any tent fabric. The 6.0 XTRV is constructed with 5 single Oxygen airframe tubes which can be easily inflated using the double action pump provided.

The Oxygen airframes utilize the Dynamic Speed Valve; the fastest and easiest inflation system on the market, in conjunction with our unique patented ‘Intelligent Frame’ Relief Valve which self-regulates the air pressure in the tube with changes in the ambient temperature to release surplus air, ensuring there is no damage done to the tube through air expansion on hot summer days.

The Vario zip out Door System allows the front door to be fully zipped out and zipped further back inside the tent to create a spacious porch area on warmer days.

The 6.0 XTRV comes complete with a 6 person inner tent but can also accommodate an additional 2 person sleeping pod, which with the inclusion of an optional solid door can create a separate sleeping area at the front of the tent which is separated from the main sleeping area to provide additional privacy.

All mesh ventilation panels have been constructed from Outdoor Revolution’s Phoenix Mesh – a smart self-repairing mesh which has the ability to ‘self-heal’ any minor snags by simply manipulating the fabric back in to shape.

Features

- Fabric:
- Frame: 5 Single Oxygen Air-Frame Tubes

Showed with ‘Vario Door’ set back into the internal position.
The O-Zone ENCLOSED CANOPY is a superb addition to the O-Zone 6.0 XTR Vario, creating additional space and protection from the elements; great for providing extra shelter for cooking and entertaining on hot summer days or alfresco dining on an evening. The Enclosed Canopy also provides incredible storage space for bikes or furniture etc, ensuring the main living space of the tent is as comfortable as possible.

O-Zone 6.0 XTR Vario - accessories

The O-Zone CANOPY simply zips on to the front of the tent to provide a fantastic sun canopy, or great covered cooking space. Simple in design and minutes to put up, the essential addition packs down easily and neatly into its own individual carry bag.

O-Zone 6.0 XTR Vario SNUG RUG - Designed to give additional luxury at your feet, the Snug Rug has a thermal backing, providing gentle shade from any midday sun in bright conditions. The added layer of insulation helps to keep the tent cool on warm days, warmer on cool or wet days by creating an air pocket between the floor and the tent roof, beneficial to reducing morning condensation.

O-Zone 6.0 XTR Vario LOUNGE LINER - Designed to create a relaxing home from home ambiance to the interior of the tent. Provides gentle shade from any roof glare in bright conditions. The added layer of insulation helps to keep the tent cool on warm days, warmer on cool days by creating an air pocket between the floor and the tent roof, beneficial to reducing morning condensation.

2 PERSON INNER TENT - Click in inner tent provides fantastic additional sleeping space for overnight guests. Made from cool grey microfibre fabric to assist in a comfortable night's sleep and plenty of mesh venting to ensure great air circulation.

O-Zone 6.0 XTR Vario LOUNGE LINER - Designed to create a relaxing home from home ambiance to the interior of the tent. Provides gentle shade from any roof glare in bright conditions. The added layer of insulation helps to keep the tent cool on warm days, warmer on cool days by creating an air pocket between the liner and the tent roof, beneficial to reducing morning condensation.

O-Zone 6.0 XTR Vario SOLID DOOR - This addition really allows the full potential of the O-Zone 6.0 XTR Vario, enabling the user to create a superb concealed storage space or a divided sleeping compartment for overnight guests or older children.

O-Zone 6.0 XTR Vario MESH DOOR - The standard door can be replaced by the optional Mesh Door. The Phoenix Mesh Door increases airflow whilst helping to prevent insects entering the tent, or pets and small children from escaping.
"A Unique fast pitch single inflation point family air tent...

With great new additions for 2017"

Inspiral 5.0; a slight tweak to the great product for 2017, providing the same superb time saving benefits of the single inflation-Inspiral tubing system. The unique embossed air frame spirals though the tent to make inflation and pitching incredibly easy, as the tent inflates automatically to its predesigned form.

The useful built on open porch with lightweight fibre poles provides added protection from the elements.

The 2017 model is compatible with an optional windshield which simply toggles on to the edge of the canopy to provide additional shelter whilst relaxing or cooking.

Inspiral Single Tube, Single Inflation...

Inspiral Single Tube, Single Inflation...

NEW 2017 Model "The largest single inflation air frame tent in the Inspiral range...
An abundance of usable space & functionality for modern family camping"
The Crossover Tent is perfect for small families or couples sleeping up to 4 people in two divided double bedroom compartments. This product has the nostalgic design of a traditional bell-tent, combined with an integrated front porch, high-quality modern materials and a contemporary finish!

The 600HD fabric provides the optimum strength-to-weight ratio of any fabric on the market. The engineered Double-Rip Stop weave provides a contemporary look and feel, whilst tackling accidental tears to the fabric. The fabric is exceptionally water-resistant and water will simply bead on the surface and roll-off. The tent is easily pitched using two internal steel poles and there are two Front Canopy Poles to create an additional large, functional shelter with added protection from the elements.

An optional front zip on canopy can be added to extend the front of the tent, providing further exterior shade and shelter.

The traditional Bell Tent gets a modern makeover...
Airedale 5.0

The Airedale 5.0 is the smallest of the Airedale range and is superb for weekends away for families or longer holidays for couples. The dramatic styling is enhanced with the HexEndure fabric, to give clean design lines with a technical look.

The lightweight, yet robust fabric ensures the Airedale 5.0 is quick and easy to erect with the assistance of the 3 Oxygen Air-Frame tubes, each fitted with a Dynamic Speed Valve and Outdoor Revolution’s patented Relief Valve, which safeguards against over inflation.

The tent has ample living space and has a handy sewn on canopy to give additional flexibility. The bedroom compartment is made from cool grey micro polyester to give clear lines of delineation between the sleeping and living space and to aid a good night’s sleep.

Key Features:
- Fabric: HexEndure
- Frame: 3 Single Oxygen Air-Frame Tubes + Fibreglass pole
- Valves: Dynamic Speed Valve + Intelligent Frame Relief Valve (Lifet ime Guarantee)

Also includes...
- Phoenix mesh doors
- Sewn in PE groundsheet
- Tinted windows
- Embossed zip-in curtains
- Integral front canopy with fibreglass pole
- Smith micro polyester inner tent
- Two thirds zip-back front door
- Two reflective endurance storm straps
- Double action hand pump

**The spacious and innovative Airedale 6.0 airframe tent.**

*Style, practicality and value come together in this stunning air tent.*

The Airedale 6.0 was the best-selling family tent in 2016 and is set for a repeat performance in 2017. A truly outstanding family tent that has the perfect footprint, including three flexible bedroom compartments, large living space and a spacious porch area. There is a solid zip back front door, a new addition for 2017 which provides additional security and storage space whilst the porch is not in use. The Airedale 6.0 has the ability to clip in an additional double inner tent, offering the potential to accommodate 8 adults.

All windows are tinted and have 100% zip in privacy blinds which give a contemporary feel and also reduces glare from the sun. The Airedale 6.0 has both low level and high level vents, to generate airflow to help reduce condensation and also a Phoenix Mesh fly screen on the door to increase air circulation further on hot days.

---

22-23
“A Vis-a-Vis 8 person pod tent with a huge living space… Set to become a firm favourite!”

The Airedale 8 features a distinct built-in porch canopy, offering protection for the entrance against the elements and on brighter days creates a sheltered area for socialising outside! The Airedale 8’s canopy is complete with 2 large windows. The canopy can be sealed off with ties to the integral front security door, creating a storage area to store and protect your camping gear!

The Airedale 8 features a large living area, illuminated by the large windows and also the two sky-fights, making the living space much lighter and therefore more usable than other designs of this type.

The bedroom pods have both low level and high level vents to provide maximum airflow and the dark micro-polyester inner tents, combined with the dark bedroom roofs, ensure the perfect conditions for a great night’s sleep. The bedrooms are set back to create additional usable head height in the central living area.

There is a rear door to increase air circulation on warmer days to provide a secondary entry point and optional vista.

More info at www.outdoor-revolution.com
“A classic 12 person pod tent, providing superb living space... Applied to an industry leading design”

The Airedale 12.0 is Outdoor Revolution’s largest tent with three separate sleeping pods able to accommodate 4 people each. The 2017 model has a re-designed inner tent that gives increased head height compared to previous models.

New for 2017 are the two central skylights that illuminate the ample central living area, making this space incredibly usable.

The Airedale 12.0 has a front porch to give shelter from the sun’s rays or a great space for cooking. The porch has an integral solid security door which creates a ‘garage space’ for furniture, bikes or other equipment.

There is both high level and low level pod ventilation, essential for maximising air circulation and in minimising condensation when so many people are sleeping in a tent.

The Airedale 12.0’s striking looks are matched perfectly in it’s practically, usability and utilisation of space.
Outdoor Revolution’s Hendrix is the most convenient, small single-inflation-point air-tent on the market for 2017. An ideal accompaniment for festival goers or spontaneous trips with its lightweight properties, simplicity and rapid inflation.

The Hendrix utilises the celebrated Inspiral single inflation system. The tube neatly weaves throughout the tents inner to create a solid frame which can be inflated within seconds using the dual-action pump provided. Tinted quarter light windows are a new introduction for 2017.

The ultra-lightweight 68HD Hex Endure fabric is designed to pack down quickly and easily into the small carry bag provided. The tent is ideal where weight, pack size and speed are of the essence. The fabric has a contemporary Hex style print to compliment the product’s simple, clean design lines. The fabric is exceptionally water-resistant and water will simply bead onto the surface and roll-off!
